

PIPELINE FILTERS®

COMPACT FILTERS ENGINEERED FOR SAFE AND EASY
CARTRIDGE ACCESS

Locking safe-release collar

For safe, quick, and easy depressurization

U.S. Patent # 10,792,596, 11,014,027, and other patents pending

Certified to
NSF/ANSI/CAN 50

Remains
safely fully-locked
while depressurizing!

OPERATION INSTRUCTIONS
Shutdown: Open manual air filter isolation valves and plug is closed. Start pump. When a steady stream of water comes out of the manual air relief valve, close it.
Operation: Record original pressure at first start-up. Clean filter before pressure rises 10 PSI higher than first start-up pressure.

Stop pump, open manual air filter isolation valves and plug is closed. Start pump. When a steady stream of water comes out of the manual air relief valve, close it.

Remove filter lid assembly by pulling the large handle locks while forcefully rotating the locking ring counter-clockwise.

To Clean Cartridge: 1. Before removing cartridge, use pressure hose to clean valve and drain out of the filter. 2. Use pressure hose to clean the filter. 3. Use pressure hose to clean the pressure differential in filter's O-ring to prevent debris from entering the filter. 4. Clean cartridge as recommended in the manual. 5. Reinstall cartridge.

**Treats up to
27,000 or 35,000 gallons!**
